

Pro Clean Green

Eco-formulated cleaning solutions

Green Cleaning moves all of us toward sustainable and more ecosensitive cleaning products that perform effectively.

INTRODUCING THE LATEST ADDITION TO OUR PROCLEAN GREEN LINE OF ENVIRONMENTALLY FRIENDLY PRODUCTS!

ProClean Green PowerSafe is approved by the EPA's Design for the Environment** program. It is an environmentally friendly, non-phosphated solid detergent for mechanical dishwashing applications. This product provides heavy duty cleaning power, yet is safe on all metals. In addition, no more struggles to move heavy pails of detergent! Much easier to use over competitive systems. Also cuts plastic packaging by as much as 75% over conventional pails, reducing environmental waste. Using environmentally preferred ingredients, Power Safe contains no hydroxides, complex Phosphates (STPP) or Nitrilotriacetate (NTA). Power Safe rinses quickly and is suited for use with newer, short-cycle dish machines.

Stock No.	Description	Pack Size	Case Wt

**When you see "DfE" on a product it means that the DfE scientific review team has screened each ingredient for potential human health and environmental effects and that based on currently available information, EPA predictive models, and expert judgment, the product contains only those ingredients that pose the least concern among chemicals in their class. Visit www.epa.gov/dfe for more information.

We at ProClean Inc believe in the preservation of the environment. For this reason, we utilize only the finest ingredients that are biodegradable and non-toxic to human and wild life.
